

Diversified Income Fund EUR (Hedged)

ADMINISTRATIVE CLASS ACCUMULATION SHARES

Fund Description

The Diversified Income Fund provides efficient access to broad global credit market exposure by investing primarily in a diversified pool of corporate and emerging market fixed income securities of varying maturities. The Fund holds both non-US dollar denominated fixed income securities and non-US dollar currency positions.

Potential Investor Benefits

This Fund offers a potentially higher yielding alternative to core fixed income portfolios and low correlation to US, Japanese and German government interest rates.

Potential Fund Advantage

The fund benefits from a diversified approach to macroeconomic views on credit trends, interest rates, duration, currencies and curve positioning.

Risk and Reward profile

Credit and Default Risk: A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk.

Currency Risk: Changes in exchange rates may cause the value of investments to decrease or increase. **Derivatives and Counterparty Risk:** The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations. **Emerging Markets Risk:** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk. Investments in these markets may expose the fund to larger gains or losses. **Liquidity Risk:** Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price. **Interest Rate Risk:** Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices). **Mortgage Related and Other Asset Backed Securities Risks:** Mortgage or asset backed securities are subject to similar risks as other fixed income securities, and may also be subject to prepayment risk and higher levels of credit and liquidity risk.

All periods longer than one year are annualised. SI is the performance since inception.

ABOUT THE BENCHMARK

The fund is considered to be actively managed in reference to the below benchmark as further outlined in the prospectus and key investor information document.

The Bloomberg Global Aggregate Credit ex Emerging Markets (EUR Hedged) provides a broad-based measure of the global developed markets investment-grade fixed income markets. The ICE BofAML BB-B Rated Developed Markets High Yield Constrained Index (EUR Hedged) tracks the performance of below investment grade bonds of corporate issuers domiciled in developed market countries rated BB1 through B3, based on an average of Moody's, S&P and Fitch. Qualifying bonds are capitalization-weighted provided the total allocation to an individual issuer (defined by Bloomberg tickers) does not exceed 2%. Issuers that exceed the limit are reduced to 2% and the face value of each of their bonds is adjusted on a pro-rata basis. Similarly, the face value of bonds of all other issuers that fall below the 2% cap are increased on a pro-rata basis. The index is rebalanced on the last calendar day of the month. The JPMorgan EMBI Global (EUR Hedged) tracks total returns for U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities, Brady bonds, loans, Eurobonds and local market instruments. It is not possible to invest in an unmanaged index.

Unless otherwise stated in the prospectus or in the relevant key investor information document, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes. †

Except for performance and currency exposure, statistics and breakdowns shown are for the fund and are not specific to the share class.[†] Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index.[Ⓔ] Yields reported gross of fees, the deduction of which will reduce the yield.[Ⓐ] Where permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only. Other share classes ratings are either lower or unavailable. A rating is not a recommendation to buy, sell or hold a fund. Copyright © 2022 Morningstar Ltd. All Rights Reserved.
