

Global Bond ESG Fund

ADMINISTRATIVE CLASS ACCUMULATION AND INCOME SHARES

Fund Description

The Global Bond ESG Fund is a diverse, actively managed portfolio of global fixed-income securities, selected according to PIMCO's internal ESG screening process. The fund invests primarily in a diversified portfolio of investment grade bonds from around the world, on the basis of PIMCO's ESG exclusions, evaluation and engagement decisions.

Potential Investor Benefits

The fund offers the potential for investors to achieve returns consistent with other core bond strategies while also making a positive environmental and social impact.

Potential Fund Advantage

The investment objective of the Global Bond ESG Fund is to seek to maximise total return, consistent with preservation of capital and prudent investment management. The fund will favour issuers with best-in-class ESG practices and those that are working to enhance them.

Risk and Reward profile

Credit and Default Risk: A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk. **Currency Risk:** Changes in exchange rates may cause the value of investments to decrease or increase. **Derivatives and Counterparty Risk:** The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations. **Emerging Markets Risk:** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk. Investments in these markets may expose the fund to larger gains or losses. **Liquidity Risk:** Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price. **Interest Rate Risk:** Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices). **Mortgage Related and Other Asset Backed Securities Risks:** Mortgage or asset backed securities are subject to similar risks as other fixed income securities, and may also be subject to prepayment risk and higher levels of credit and liquidity risk. **China InterBank Bond Market ("CIBM"):** The fund may be exposed to liquidity risks, settlement risks, default of counterparties and market volatility associated with CIBM. In addition, the CIBM rules are new and still subject to further clarification and/or changes, which may adversely affect the fund's capability to invest in the CIBM.

ABOUT THE BENCHMARK

The fund is considered to be actively managed in reference to the below benchmark as further outlined in the prospectus and key investor information document.

Bloomberg Global Aggregate (USD Hedged) Index provides a broad-based measure of the global investment-grade fixed income markets. The three major components of this index are the U.S. Aggregate, the Pan-European Aggregate, and the Asian-Pacific Aggregate Indices. The index also includes Eurodollar and Euro-Yen corporate bonds, Canadian Government securities, and USD investment grade 144A securities. It is not possible to invest directly in an unmanaged index.

Unless otherwise stated in the prospectus or in the relevant key investor information document, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes.[‡]

[†] Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index. [Ⓞ] Yields reported gross of fees, the deduction of which will reduce the yield. [‡] Annualised Distribution Yield is as of last quarter ending 05/31/2022. [Ⓐ] Where permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only.
