

# Asia Strategic Interest Bond Fund

## E CLASS ACCUMULATION AND INCOME SHARES

### Fund Description

The Asia Strategic Interest Bond Fund is a flexible and actively managed portfolio that seeks to generate attractive and stable income through investing at least two thirds of its total assets in fixed income instruments in Asia ex-Japan. The fund may also invest up to one third of its total assets outside of Asia ex-Japan. The fund will allocate to both investment grade and high yield bonds and across sovereigns, quasi-sovereigns and corporate issuers. Whilst predominantly invested in hard currency bonds, the portfolio may also seek tactical opportunities in local currency denominated bonds.

### Potential Investor Benefits

The fund seeks to meet the needs of investors who are targeting a competitive and consistent level of income without compromising long term capital appreciation. It offers the opportunity to gain exposure to different sectors of the Asian fixed interest markets, while also having the flexibility to allocate to select opportunities outside of Asia.

### Potential Fund Advantage

The fund employs PIMCO's fundamental research process, including top-down economic views and bottom-up security selection and benefits from PIMCO's extensive global resources.

### Risk and Reward profile

**Credit and Default Risk:** A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk.

**Currency Risk:** Changes in exchange rates may cause the value of investments to decrease or increase. **Derivatives and Counterparty Risk:** The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations. **Emerging Markets Risk:** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk. Investments in these markets may expose the fund to larger gains or losses.

**Liquidity Risk:** Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price. **Interest Rate Risk:** Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices). **China InterBank Bond Market ("CIBM"):** The fund may be exposed to liquidity risks, settlement risks, default of counterparties and market volatility associated with CIBM. In addition, the CIBM rules are new and still subject to further clarification and/or changes, which may adversely affect the fund's capability to invest in the CIBM.
