

PIMCO at a Glance

PIMCO is a global leader in active fixed income. With our launch in 1971 in Newport Beach, California, PIMCO introduced investors to a total return approach to fixed income investing. For more than 50 years, we have worked relentlessly to help millions of investors pursue their objectives – regardless of shifting market conditions. As active investors, our goal is not just to find opportunities, but to create them. To this end, we remain firmly committed to the pursuit of our mission: delivering superior investment returns, solutions and service to our clients.

PROCESS

Tested in virtually every market environment, our investment process helps our clients manage risks and pursue returns over meaningful time periods.

All information is as of 30 June 2022, unless otherwise noted.

Past performance is not a guarantee or a reliable indicator of future results. All investments contain risk and may lose value. There is no guarantee that investment or portfolio strategies will work under all market conditions or are suitable for all investors and each investor should evaluate their ability to invest long-term, especially during periods of downturn in the market. Investors should consult their investment professional prior to making an investment decision.

ASSETS UNDER MANAGEMENT (AUM)*

PIMCO manages \$1.82 trillion entrusted to us by:

- Central banks
- Sovereign wealth funds
- Public and private pension funds
- Financial and nonfinancial corporations
- Foundations and endowments
- Financial advisors
- Family offices
- Individual investors

* PIMCO manages \$1.82 trillion in assets, including \$1.45 trillion in third-party client assets as of 30 June 2022. Assets include \$86.0 billion (as of 31 March 2022) in assets of clients contracted with Allianz Real Estate, affiliates and wholly-owned subsidiary of PIMCO and PIMCO Europe GmbH. The number of countries where clients are located is based on client account tax domicile.

** Based on PIMCO managed portfolios with at least a 5-year history. The after-fees performance of each portfolio was compared to the portfolio's primary benchmark. If the after-fees portfolio performance was greater than the benchmark performance for a given period, the assets in that portfolio were included in the outperforming data. Benchmark outperformance indicates the performance of a portfolio as compared to its benchmark. As such, it does not indicate that a portfolio's performance was positive during any given period. For example, if a portfolio declined 3% during a given period, and its benchmark declined 4%, the portfolio would have outperformed its benchmark, even though it lost value during the period. Certain absolute return oriented portfolios contained within the data may inflate the data either positively or negatively due to the low return/volatility characteristics of the primary benchmark. For example a portfolio measured against 3-month USD Libor would be more likely to out- or under perform its benchmark. **No measure of past performance should be understood to ensure that future performance will be positive, whether on a relative or absolute basis.**
